

# **SCTR's PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**An Autonomous Institute affiliated to the  
Savitribai Phule Pune University  
Approved by AICTE & Government of Maharashtra,  
Accredited by NAAC (A+) & NBA [All eligible UG Programs]**

## **Curriculum for Second Year B. Tech. Computer Engineering**

**(2025-26 Course)\***

**With effect from (June 25)  
National Education Policy (NEP) 2020 Compliant  
\*Approved by the Board of Studies (BoS) and Academic Council**

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

Abbreviations used (Refer [1-3] for more details)

Sr. No.	Broad Category	Sub- Category of course	Category Code
I.	BSC/ESC	Basic Science Course (BSC)	01
		Engineering Science Course (ESC)	02
II.	Program Courses (PC)	Program Core Course (PCC)	03
		Program Elective Course (PEC)	04
III.	Multidisciplinary courses (MC)	Multidisciplinary Minor (MDM)	05
		Open Elective (OE) Other than particular program	06
IV.	Skill Courses (SC)	Vocational and Skill Enhancement Course (VSEC)	07
V.	Humanities Social Science and Management (HSSM)	Ability Enhancement Course (AEC-01, AEC-02)	08
		Entrepreneurship/Economics/ Management Courses (EEM)	09
		Indian Knowledge System (IKS)	10
		Value Education Course (VEC)	11
VI.	Experiential Learning Courses (ELC)	Research Methodology (RM)	12
		Community engagement Project (CEP) / Field Project (FP)/Co-curricular Activities (CCA)	13
		Project (PRJ)	14
		Internship/ On Job Training (IP/OJT)	15

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

<b>1303101: Data Structures</b>		
<b>Teaching Scheme:</b> L: 03 Hrs./week	<b>Credits: 03</b>	<b>Examination Scheme:</b> CIE: 20 Marks ISE: 20 Marks ESE: 60 Marks
<b>Prerequisite:</b> 1. C Programming for Problem Solving (CPPS) 2. Object Oriented Programming Using C++/Java (OOPC)		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>1. To understand the basic techniques of algorithm performance analysis.</li> <li>2. To understand various data searching and sorting methods with pros and cons.</li> <li>3. To acquaint with the structural constraints and advantages in usage of the data using Hashing.</li> <li>4. To learn data manipulation using various data structures like Link List, Stack, Queues.</li> <li>5. To understand the concept of tree data Structures and manipulate data using its variants.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li>1. <b>Analyze</b> the performance of searching and sorting techniques based on the Time and Space complexities of Algorithms.</li> <li>2. <b>Demonstrate</b> the use of linear data structures - Array and Linked lists to store and process structured data.</li> <li>3. <b>Apply</b> principles and primitive operations of Stack and Queue Data Structures to <b>solve</b> Expression Conversion, Evaluation, and Job scheduling problems.</li> <li>4. <b>Compare</b> static and dynamic data structure implementations to <b>select</b> the suitable method for solving programming problems.</li> <li>5. <b>Demonstrate</b> basic operations of binary trees and all its variants along with their applications.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Introduction to Analysis of Algorithm</b>	<b>10 Hrs.</b>
	Introduction of Algorithms, Analysis of Algorithms, Complexity of algorithms- Space complexity, Time complexity. Data Structures: Abstract Data Types (ADT), Concept of linear and Non-linear data structures. Use of Array and Associative/Jagged Arrays. Searching: Search Techniques, Sequential search, Sentinel search, Binary search, Fibonacci search. Sorting- Types of Sorting- Internal and External Sorting, Stable Sorting, Sorting methods- Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Comparison of All Sorting Methods.	

	<p>Hashing: Types of Hashing, Hash table, Hash functions, Collision resolution strategies.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>1. A customer purchased groceries from a store and wants to verify the prices of specific items in the bill where the items are not in sorted order. Write a C++/Java program to apply any 02 appropriate Searching Algorithms to check the cost of a particular item in the bill. Mention the Time and Space Complexities of Algorithms.</li> <li>2. An E-commerce website has a range of products having Product id, name, manufacturer, price and quality rating out of 5. Write a C++/Java Program to display products as...             <ol style="list-style-type: none"> <li>a. In Increasing order of Product id (Use Bubble Sort)</li> <li>b. In Increasing order of Product price (Use Selection Sort)</li> <li>c. In Decreasing order of Product Quality Rating (Use Insertion Sort)</li> </ol> </li> <li>3. Write a C++/Java program to display the employee names in the order of their joining year. Analyze and compare the efficiency and suitability of different algorithms in solving the problem. Justify the choice of algorithms.</li> <li>4. Consider a telephone book database where the information is stored as Client's name and telephone number. Write a C++/Java program to quickly search the client's telephone number from the database with O(1) complexity. (Hint: Make use of a Hash table and hash function).</li> </ol>	
<p><b>Module II</b></p>	<p><b>Linked Lists</b></p>	<p><b>8 Hrs.</b></p>
	<p>Static memory allocation vs Dynamic Memory Management, linked list using dynamic memory management, Linked List- Abstract Data Type, linked list operations, Types of linked list- Linear, Circular linked lists and Doubly Linked List and operations, doubly circular linked list, Polynomial representation using Linked List, Generalized Linked List (GLL) concept and use of GLL for multi-variable polynomial.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>1. Consider a person creating a playlist of media/music files. The person wants to store music_id, title, time_duration for every entry and wants the following functionalities:             <ol style="list-style-type: none"> <li>a. Able to insert a media file at any position dynamically.</li> <li>b. Able to delete any entry from the list dynamically.</li> <li>c. Able to sort on any field (music_id, title,time_duration)</li> <li>d. Able to play continuous looping fashion.</li> </ol> </li> <li>2. There is a student's club named 'Techno-Fun' club where Students can get membership on request. Similarly one may cancel the membership of a club. First node is reserved for the president of the club and the last node is reserved for the secretary of the club. Choose a type of linked list to store student PRN and Name. Write functions to: a) Add members b) show members c) delete members, d) Compute total number of members e) Two linked lists exist for two divisions. Concatenate two lists.</li> <li>3. Browser maintains the history which refers to a list of recently visited websites</li> </ol>	

	<p>or web pages in a data structure. Write a C++/Java program to store the browser history or navigation information dynamically as page_id and recent time-stamp. Write functions to</p> <ol style="list-style-type: none"> <li>a. Visit a specific web page.</li> <li>b. Navigate forward and backward.</li> <li>c. Add new web pages.</li> <li>d. Deleting web pages from existing lists.</li> </ol> <p>4. The ticket booking system of Inox theater has to be implemented using C++/Java program. There are M rows and N seats in each row. Doubly circular linked list has to be maintained to keep track of free seats at rows. Assume some random booking to start with. Use an array to store pointers (Head pointer) to each row. On demand</p> <ol style="list-style-type: none"> <li>a. The list of available seats is to be displayed,</li> <li>b. The seats are to be booked,</li> <li>c. The booking can be cancelled.</li> </ol> <p>5. In an application maintaining legal documents which are structured hierarchically with sections, subsections, paragraphs, and sub-paragraphs. Design a program to represent and manage such a document structure. Each node will store either textual data element (title of section, subsection, paragraph, subparagraph), or A pointer to another linked list (subsections, paragraph, subparagraph) Hint: Use Generalized Linked Lists A = { S1, S2 {P1, P2, P3 {SP1, SP2}}, S3 {P1.P2}, S4, S5}.</p>	
<p><b>Module III</b></p>	<p><b>Stacks &amp; Queues</b></p>	<p><b>10 Hrs.</b></p>
	<p>Stacks Abstract Data Type, Representation of Stacks Using Sequential Organization, stack operations, Multiple Stacks, Applications of Stack-Polish notation, need for prefix and Postfix expressions, Expression Evaluation and Conversion, Postfix expression evaluation, Linked Stack and Operations. Recursion- concept, variants of recursion- direct, indirect, head, tail. Queue as Abstract Data Type, Realization of Queues Using Arrays, Circular Queue, Advantages of circular queues. Multi-queues, Deque, Priority Queue, Linked Queue and operations. Applications of Queue- Job Scheduling.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>1. In an expression each opening symbol has a corresponding closing symbol and the pairs of parentheses are properly nested. Write a C++/Java program using Stack to check whether a given expression is well parenthesized or not.</li> <li>2. The expressions can be represented in infix, prefix and postfix form but the system can evaluate postfix expressions easily. Write C++/Java program for expression conversion as infix to postfix and its evaluation using Stack based on given conditions.</li> <li>3. Consider a Pizza parlour where the orders are received and processed from</li> </ol>	

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

	<p>either ends of the queue. Choose an appropriate data structure to implement a linear list of elements in which additions and deletions of items may be made at either ends of the list.</p>	
<p><b>Module IV</b></p>	<p><b>Trees</b></p>	<p><b>10 Hrs.</b></p>
	<p>Definition &amp; Basic Terminology of Tree, Binary Tree, Full Binary Tree, Complete Binary Tree, Binary Search Tree and primitive operations, Threaded Binary Tree, Heap Tree, AVL tree and its operations. Introduction to B Tree &amp; B+ Tree.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>1. Write a C++/Java program to construct a binary search tree by inserting the values in the order given. Perform following operations - i. Insert nodes, ii. Display nodes by Preorder, In-order, Post-order, BFS and DFS. iii. Find number of nodes in longest path from root, iv. Minimum data value found in the tree, v. Change a tree so that the roles of the left and right pointers are swapped at every node, vi. Search for a value.</li> <li>2. In the memory the files and folders are stored in Hierarchical Manner. Write a C++/Java program to create the following structure of files and folders using Binary Tree.</li> </ol>  <pre> graph TD     F01[Folder-01] --&gt; FA[Folder-A]     F01 --&gt; FB[Folder-B]     FA --&gt; FA1[File-A1]     FA --&gt; FA2[File-A2]     FB --&gt; FB1[File-B1]     FB --&gt; FB2[File-B2]     </pre>

<b>1303102: Computer Organization and Architecture</b>		
<b>Teaching Scheme:</b> L: 03 Hrs./week	<b>Credits: 03</b>	<b>Examination Scheme:</b> CIE: 20 Marks ISE: 20 Marks ESE: 60 Marks
<b>Prerequisite:</b> Digital Electronics and Logic Design		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>To understand the structure, function , characteristics of computer Organization.</li> <li>To acquaint the learner with instruction set and logic to build Assembly Language Programs (ALP).</li> <li>To understand instruction level parallelism, parallel organization of multiprocessor,multithreading .</li> <li>To Explore multiple processor organizations , memory architectures (UMA, NUMA, CC-NUMA), and multicore systems.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li><b>Describe</b> the basic components of computer architecture</li> <li><b>Analyze</b> various addressing modes to perform arithmetic and logical operations using different data types .</li> <li><b>Illustrate</b> concept and design principles of memory systems- cache, virtual and main memory.</li> <li><b>Explore</b> multiple processor organizations (SSID, SIMD, MISD, MIMD) and memory architectures</li> <li><b>Analyze</b> different approaches to multithreading and explore multicore systems.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Introduction to Processor Architecture</b>	<b>10 Hrs.</b>
	<p><b>Basic structures of computers</b>-Functional units, performance Measurement. Evolution of computer architecture. Processor Structure and Function - Processor Organization, Register Organization, The Instruction cycle, instruction pipeline.</p> <p><b>Computer Arithmetic:</b> Integer and Floating-point representation and arithmetic.</p> <p><b>Instruction sets:</b> Characteristics and function, Data types, addressing modes and formats, assembler directives, execution of program. Instruction types-data transfer, arithmetic, logical, branch, call, ret.</p> <p><b>Reduced instruction set computer:</b> Instruction execution characteristics, RISC architecture, RISC pipeline, RISC Vs CISC.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>Write a program using inline assembly code for adding two short/long int numbers.</li> <li>Write a program using inline assembly code to find signed multiplication and division.</li> <li>Write a program using inline assembly code to accept the string and to display its length.</li> </ol>	

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

<b>Module II</b>	<b>Memory organization and management</b>	<b>10 Hrs</b>
	<p><b>Memory system overview:</b> characteristics of memory system, memory hierarchy. Cache Memory – Basics, cache memory principles, elements of cache design, cache coherence and MESI protocol.</p> <p><b>Internal Memory Technology:</b> DRAM operation, row decoder column decoder chip organization, error correction code (single and double).</p> <p><b>Virtual Memory:</b> main memory allocation, Virtual to Physical Address Translation, Paging, Page Faults, TLB.</p> <p><b>Case study:</b> Memory management in advanced processors.</p> <p><b>Suggested List of Lab Assignments:</b></p> <ol style="list-style-type: none"> <li>1. Write a program using inline assembly code to count the number of positive and negative numbers from the array.</li> <li>2. Stack simulation in function call-with parameter using compiler explorer tool.</li> <li>3. Write a program using inline assembly code to find the factorial of a given integer number on a command line .</li> </ol>	
<b>Module III</b>	<b>Parallel processing and Multicore architecture</b>	<b>8 Hrs</b>
	<p><b>Multiple Processor Organization:</b> SISD, SIMD, MISD, MIMD. Uniform memory access (UMA), Non uniform memory access (NUMA), CC-NUMA. Multicore: Hardware and software performance issues, need of multicore. Multicore organization, heterogeneous multicore organization: CPU and GPU.</p> <p><b>Case study:</b> Intel Core i7 5960X</p>	
<b>Module IV</b>	<b>Multicore programming</b>	<b>8 Hrs.</b>
	<p>Software developer viewpoint for multicore programming. Challenges of multicore programming. <b>Multithreading:</b> Thread, comparing thread to processes, Approaches of Multithreading.</p> <p><b>Communication and synchronization of concurrent tasks:</b> Communication and synchronization, synchronizing concurrency, thread Strategy Approaches</p> <p><b>Case study:</b> POSIX</p> <ol style="list-style-type: none"> <li>1. Write an application to demonstrate inter process communication.</li> <li>2. Write a multithreading application for calculators.</li> </ol>

<b>1303103: Discrete Mathematics</b>		
<b>Teaching Scheme:</b> L: 03 Hrs./Week	<b>Credits: 03</b>	<b>Examination Scheme:</b> CIE: 20 Marks ISE: 20 Marks ESE: 60 Marks
<b>Prerequisite:</b> Linear Algebra, Basic Mathematics.		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>To understand the use of set theory and fundamentals of counting principle.</li> <li>To understand concepts of relation and functions.</li> <li>To solve problems like Traveling Salesperson, Shortest Path and Minimum Spanning Tree.</li> <li>To understand and apply algebraic systems.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the Course Students will be able to</b> <ol style="list-style-type: none"> <li><b>Formulate</b> problems precisely using set theory, logic and counting.</li> <li><b>Apply</b> formal proof techniques to explain the reasoning clearly.</li> <li><b>Apply</b> the concept of relations and functions to solve computing problems.</li> <li><b>Solve</b> Traveling Salesperson, Minimum Spanning Tree, Shortest Path and Huffman Coding using graph theory.</li> <li><b>Evaluate</b> the algebraic structures using properties of binary operations.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Set Theory and Counting</b>	<b>8 Hrs.</b>
	<b>Set Theory:</b> Introduction to Sets– Set Operations, Cardinality of set, Principle of inclusion and exclusion, Types of Sets, Power set, Methods of Proof-Proof by Contradiction, Proof by Mathematical Induction. <b>Propositional Logic-</b> logic, Propositional Equivalences, Application of Propositional Logic- Translating English Sentences. <b>Counting:</b> The Basics of Counting, rule of Sum and Product, Permutations and Combinations.	
<b>Module II</b>	<b>Relations and Functions</b>	<b>8 Hrs.</b>
	<b>Relations:</b> Relations and their Properties, n-ary relations, Representing relations, Equivalence relations, Partial orderings, Hasse diagram, Chains and Anti-Chains, Transitive closure and Warshall's algorithm. <b>Functions:</b> Surjective, Injective and Bijective functions, Identity function, Inverse functions and Compositions of functions.

1303204 Data Structures Lab		
<b>Teaching Scheme:</b> P: 04 Hrs./week	<b>Credits:</b> 02	<b>Examination Scheme:</b> CIE(TW): 50 Marks ESE(PR): 50 Marks
<b>Prerequisite:</b> 1. C Programming for Problem Solving (CPPS) 2. Object Oriented Programming Using C++ (OOPC)		
<p><b>Course Objectives:</b>  <b>Course intends to prepare the students</b></p> <ol style="list-style-type: none"> <li>1. To understand the working of Searching &amp; Sorting Algorithms.</li> <li>2. To learn linked list and types of linked list implementations.</li> <li>3. To acquaint with the use of Hash Table using Hash Functions.</li> <li>4. To learn applicability of Stack and Queue data structures.</li> <li>5. To understand the working of Binary Tree operations.</li> </ol>		
<p><b>Course Outcomes:</b>  <b>At the end of the Course Students will be able to</b></p> <ol style="list-style-type: none"> <li>1. <b>Implement</b> various Searching &amp; Sorting Algorithms.</li> <li>2. <b>Select</b> appropriate types of linked lists implementations for solving problems.</li> <li>3. <b>Apply</b> suitable Hash Functions for data manipulation in Hash Table.</li> <li>4. <b>Apply</b> Stack and Queue data structures for expression conversion &amp; recursion.</li> <li>5. <b>Implement</b> primitive operations of various types of Binary Trees.</li> </ol>		
List of Assignments		
01	A customer purchased groceries from a store and wants to verify the prices of specific items in the bill where the items are not in sorted order. Write a C++/Java program to apply any 02 appropriate Searching Algorithms to check the cost of a particular item in the bill. Mention the Time and Space Complexities of Algorithms.	
02	An E-commerce website has a range of products having Product id, name, manufacturer, price and quality rating out of 5. Write a C++/Java Program to display products as... <ol style="list-style-type: none"> <li>1. In Increasing order of Product id (Use Bubble Sort)</li> <li>2. In Increasing order of Product price (Use Selection Sort)</li> <li>3. In Decreasing order of Product Quality Rating (Use Insertion Sort)</li> </ol>	
03	Write a C++/Java program to display the employee names in the order of their joining year. Analyze and compare the efficiency and suitability of different algorithms in solving the problem. Justify the choice of algorithms.	

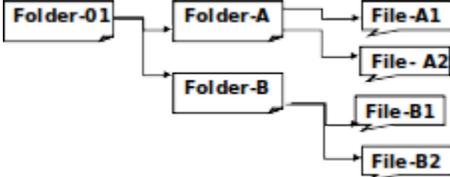

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43****Second Year B. Tech. Curriculum****With effect from the A.Y. 2025-26**

04	Consider a telephone book database where the information is stored as Client's name and telephone number. Write a C++/Java program to quickly search the client's telephone number from the database with O(1) complexity. (Hint: Make use of a Hash table and hash function).
05	Consider a person creating a playlist of media/music files. The person wants to store music_id, title, time_duration for every entry and wants the following functionalities: <ol style="list-style-type: none"><li>1. Able to insert a media file at any position dynamically.</li><li>2. Able to delete any entry from the list dynamically.</li><li>3. Able to sort on any field (music_id, title,time_duration)</li><li>4. Able to play continuous looping fashion.</li></ol>
06	There is a student's club named 'Techno-Fun' club where Students can get membership on request. Similarly one may cancel the membership of a club. First node is reserved for the president of the club and the last node is reserved for the secretary of the club. Choose a type of linked list to store student PRN and Name. Write functions to: a) Add members b) show members c) delete members, d) Compute total number of members e) Two linked lists exist for two divisions. Concatenate two lists.
07	Browser maintains the history which refers to a list of recently visited websites or web pages in a data structure. Write a C++/Java program to store the browser history or navigation information dynamically as page_id and recent time-stamp. Write functions to... <ol style="list-style-type: none"><li>1. Visit a specific web page.</li><li>2. Navigate forward and backward.</li><li>3. Add new web pages.</li><li>4. Deleting web pages from existing lists.</li></ol>
08	The ticket booking system of Inox theater has to be implemented using C++/Java program. There are M rows and N seats in each row. Doubly circular linked list has to be maintained to keep track of free seats at rows. Assume some random booking to start with. Use an array to store pointers (Head pointer) to each row. On demand <ol style="list-style-type: none"><li>1. The list of available seats is to be displayed,</li><li>2. The seats are to be booked,</li><li>3. The booking can be cancelled.</li></ol>
09	In an application maintaining legal documents which are structured hierarchically with sections, subsections, paragraphs, and sub-paragraphs. Design a program to represent and manage such a document structure. Each node will store either textual data element (title of section, subsection, paragraph, subparagraph), or A pointer to another linked list (subsections, paragraph, subparagraph) Hint: Use Generalized Linked Lists $A = \{ S1, S2 \{P1, P2, P3 \{SP1, SP2\}\}, S3 \{P1.P2\}, S4, S5\}.$
10	In an expression each opening symbol has a corresponding closing symbol and the pairs of parentheses are properly nested. Write a C++/Java program using Stack to check whether a given expression is well parenthesized or not.

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

11	The expressions can be represented in infix, prefix and postfix form but the system can evaluate postfix expressions easily. Write C++/Java program for expression conversion as infix to postfix and its evaluation using Stack based on given conditions.
12	Consider a Pizza parlour where the orders are received and processed from either ends of the queue. Choose an appropriate data structure to implement a linear list of elements in which additions and deletions of items may be made at either ends of the list.
13	Write a C++/Java program to construct a binary search tree by inserting the values in the order given. Perform following operations - i. Insert nodes, ii. Display nodes by Preorder, In-order, Post-order, BFS and DFS. iii. Find number of nodes in longest path from root, iv. Minimum data value found in the tree, v. Change a tree so that the roles of the left and right pointers are swapped at every node, vi. Search for a value.
14	<p>In the memory the files and folders are stored in Hierarchical Manner. Write a C++/Java program to create the following structure of files and folders using Binary Tree.</p>  <pre>graph LR; Folder-01 --&gt; Folder-A; Folder-01 --&gt; Folder-B; Folder-A --&gt; File-A1; Folder-A --&gt; File-A2; Folder-B --&gt; File-B1; Folder-B --&gt; File-B2;</pre>

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

<b>1303205 Computer Organization and Architecture Lab</b>		
<b>Teaching Scheme:</b> P: 02 Hrs. / Week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE (TW): 25 Marks ESE(OR): 50 Marks
<b>Prerequisite:</b> Digital Electronics and Logic Design Laboratory		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>1. To understand basic architectural features of processors.</li> <li>2. To acquaint the learner with application instruction set and logic to build assembly language programs.</li> <li>3. To learn command line argument and stack simulation using tools</li> <li>4. To explore multithreading concepts using POSIX</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li>1. <b>Use</b> Assembler tool for 64-bit assembly programming.</li> <li>2. <b>Exhibit</b> skill of assembly language programming using instruction set.</li> <li>3. <b>Demonstrate</b> stack simulation using function call</li> <li>4. <b>Explore</b> multithreading concept using Arithmetic calculator</li> </ol>		
<b>List of Assignments</b>		
1.	Write inline assembly code for adding two short/long int numbers.	
2.	Write inline assembly code to find signed multiplication and division.	
3.	Write inline assembly code to accept the string and to display its length.	
4.	Write inline assembly code to count the number of positive and negative numbers from the array.	
5.	Stack simulation in function call-with parameter using compiler explorer tool.	
6.	Write inline assembly code to find the factorial of a given integer number on a command line.	
7.	Write an application to demonstrate inter process communication.	
8.	Write a multithreading application for Arithmetic calculators.

<b>1309101: Engineering Economics and Financial Management</b>		
<b>Teaching Scheme:</b> L: 01 Hr./week	<b>Credits: 01</b>	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<b>Prerequisite:</b> Basic Mathematics, Introductory Engineering Concepts.		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>1. Understand and apply the concept of Time Value of Money.</li> <li>2. To equip students with the skills to apply financial evaluation techniques.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li>1. <b>Compute</b> the worth of money at various points of time.</li> <li>2. <b>Apply</b> various depreciation methods in determining the value of an asset</li> <li>3. <b>Describe</b> and apply the basic techniques of financial statement analysis.</li> <li>4. <b>Evaluate</b> the replacement of an existing asset based on standard replacement analysis techniques.</li> <li>5. <b>Evaluate</b> the best alternative in Engineering Economics problems considering risk and safety.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Financial Decision Making: Time Value and Cash Flow Analysis</b>	<b>4 Hrs.</b>
	Time value of money, Interest factors for discrete compounding, Nominal & effective interest rates, Present and future worth of Single, Uniform, and Gradient cash flow. Related problems and case studies.	
<b>Module II</b>	<b>Economic Analysis and Decision-Making Techniques</b>	<b>4 Hrs.</b>
	Bases for comparison of alternatives, Present worth amount, Capitalized equivalent amount, Annual equivalent amount, Future worth amount, Capital recovery with return, Rate of return method, Incremental approach for economic analysis of alternatives, Replacement analysis.	
<b>Module III</b>	<b>Rate-of-Return Analysis and Depreciation</b>	<b>4 Hrs.</b>
	Break even analysis for single product and multi product firms, Break even analysis for evaluation of investment alternatives. Physical & functional depreciation, Straight line depreciation, declining and double declining balance method of depreciation, Sum-of-the-Years Digits, Sinking Fund and Service Output Methods, Case Study.	
<b>Module IV</b>	<b>Project Risk and Uncertainty</b>	<b>3 Hrs.</b>
	Balance sheet and profit & loss statement. Meaning & Contents. Ratio analysis, financial ratios such as liquidity ratios, Leverage ratios, Turnover ratios, and profitability ratios, Drawbacks. Safety and Risk, Assessment of Risk and safety, Case study, Risk Benefit Analysis and Reducing Risk.

<b>0308202: Professional Development and Career Readiness</b>		
<b>Teaching Scheme:</b> P: 02 Hrs./week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE(TW) : 25 Marks
<b>Prerequisite:</b> Course on Soft Skills (SS)		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>1. Prepare a good resume, prepare for interviews and group discussions.</li> <li>2. Explore the desired career opportunities in the employment market in consideration of personal strengths, weakness, opportunities, and threats (SWOT).</li> <li>3. Acquire career skills and to partake in and fully pursue a successful career path.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li>1. Prepare the resume on an appropriate template without any grammatical and syntax errors, and Present and Discuss with students.</li> <li>2. Participate in a simulated interview and Evaluate your own performance for betterment.</li> <li>3. Demonstrate effective communication skills through Group Discussion, self-management attributes.</li> <li>4. Define personal and career goals (short-term and long-term) using introspective skills and Perform SWOT assessment.</li> <li>5. Identify career opportunities in consideration of potential and aspirations.</li> </ol>		
<b>Course Contents</b>		
<b>Expt. No</b>	<b>Title/Problem Statement</b>	<b>Hrs.</b>
1.	Trust and Collaboration Explain the Importance of Trust in Creating a Collaborative Team Agree to Disagree and Disagree to Agree – Spirit of Teamwork • Understanding Fear of Being Judged and Strategies to Overcome Fear	4 Hrs.
2.	Listening as a Team Skill Advantages of Effective Listening Listening as a Team Member and Team Leader. Use of active listening strategies to encourage sharing of ideas (full and undivided attention, no interruptions, no pre-think, use empathy, listen to tone and voice modulation, recapitulate points).	2 Hrs.
3.	Brainstorming Brainstorming as a Technique to Promote Idea Generation a. Brainstorming: Meaning and the Process b. Procedure for Conducting Brainstorming c. Importance of Using Brainstorming Technique	2 Hrs.

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

	d. Types of Brainstorming	
4.	Learning and Showcasing the Principles of Documentation of Team Session Outcomes.	2 Hrs.
5.	Social and Cultural Etiquette Need for Etiquette (impression, image, earn respect, appreciation) • Aspects of Social and Cultural/Corporate Etiquette in Promoting Teamwork • Importance of Time, Place, Propriety and Adaptability to Diverse Cultures	2 Hrs.
6.	Digital Ethics Digital Ethics i. Digital Literacy Skills, ii. Digital Etiquette, iii. Digital Life Skills	2 Hrs.
7.	Cyber Security The Art of Protecting Secrets a. Understanding Encryption and Decryption and Its Different Types b. Art of Data Masking c. Firewall and Its Proper Use in Cyber Protection	2 Hrs.

<b>0311101 Universal Human Values</b>		
<b>Teaching Scheme:</b> L: 01 Hr./Week T: 01 Hr./Week	<b>Credits:</b> 02	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<b>Prerequisite:</b> UHV-I: Universal Human Values-Introduction (SIP)		
<p><b>Course Objectives:</b>  <b>Course intends to prepare the students</b></p> <ol style="list-style-type: none"> <li>To help the students appreciate the essential complementarity between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity which are the core aspirations of all human beings.</li> <li>To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of existence. Such a holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way.</li> <li>To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behaviour and mutually enriching interaction with Nature. Thus, this course is intended to provide a much-needed orientational input in value education to the young enquiring minds.</li> </ol>		
<p><b>Course Outcomes:</b>  <b>At the end of the course students will be able to</b></p> <ol style="list-style-type: none"> <li><b>Distinguish</b> between values and skills, happiness and accumulation of physical facilities, the Self and the Body, Intention and Competence of an individual, etc.</li> <li><b>Analyze</b> the value of harmonious relationships based on trust and respect in their life and profession.</li> <li><b>Examine</b> the role of a human being in ensuring harmony in society and nature and Apply the understanding of ethical conduct to formulate the strategy for ethical life and profession.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Basic aspiration of Human being &amp; Harmony in Human being</b>	<b>6 Hrs.</b>
	Understanding Value Education, Self-exploration as the Process for Value Education, Continuous Happiness and Prosperity – the Basic Human Aspirations, Right Understanding, Relationship and Physical Facility, Happiness and Prosperity – Current Scenario, Method to fulfill the Basic Human Aspirations. Understanding Human being as the Co-existence of the Self and the Body, distinguishing between the Needs of the Self and the Body, The Body as an Instrument of the Self, Understanding Harmony in the Self, Harmony of the Self with the Body, Program to ensure self-regulation and Health.	

**List of Tutorial Assignments:**

1. Self-exploration- Results in the discovery of the inherent relationship, harmony and co-existence facilitating transformation towards a holistic world vision and 'Human Consciousness'.

What does a fulfilling life mean for you ? List out the top five points that occur to you when you think of a fulfilling life. While making the list, please consider your entire life, not just the present stage of your life (childhood, youth, middle age, old age, etc).

2. Sharing about Oneself, Exploring Human Consciousness, Exploring Natural Acceptance.

Look into yourself, into 'what I am' and into 'what is naturally acceptable to me'. Make a list of at least ten things you can observe in your thought, behaviour or work. Now note these down in a tabular format.

Can you see that 'what I am' and 'what is naturally acceptable to me' are two realities within you? Who else can see these two realities, other than you ? Are you able to see that all those things that are naturally acceptable to you are really valuable for you ? Write down the conclusions you have arrived at from seeing these two realities.

3. Look into what you really want to be and prepare a document (like a resume) as you see yourself three years from now. We can call it 'future resume'. Please include following five sub-sections:

- a) About you
- b) About your role in your family
- c) About your participation in the workplace
- d) About your participation in the neighbourhood / institution / larger society
- e) About your interaction with the rest of nature

Can you see that you already have commitment and potential for it ? And you can make a program to use your next three years productively.

4. Make a list of your desires. Now for each item on the list, find out what would be necessary to fulfil it, i.e. will it require:

- a) right understanding ?
- b) relationship (right feeling)
- c) physical facility ?

5. List your activities throughout a typical day in your life. Categorise these activities as activity for developing right understanding, activity of fulfilment in relationship and activity for physical facility. Find out what percentage of your time and efforts is being spent for each of these three. What do you conclude from this exercise ?

6. Make your list of desires. For each desire, identify the primary source of motivation (sensation, preconditioning or natural acceptance). If there is any desire which has more than one source of motivation, split it into two or more desires. Now write down your observations:

- a) What percentage (approximately) of your desires are motivated by your natural acceptance?
- b) What percentage (approximately) of your desires are motivated by sensation or preconditioning?
- c) What effort is necessary to be completely self-organised or autonomous (if that is your goal)?

**With effect from the A.Y. 2025-26**

	<p>7. Exploring the difference of Needs of Self and Body, Exploring Sources of Imagination in the Self, Exploring Harmony of Self with the Body.</p> <p>8. Exploring the Feeling of Trust, Exploring the Feeling of Respect.</p>	
<b>Module II</b>	<b>Harmony in the Family, society &amp; Nature / Existence</b>	<b>8 Hrs.</b>
	<p>Harmony in the Family – the Basic Unit of Human Interaction, Values in Human-to-Human Relationship, Nine universal values in relationships viz. Trust, Respect, Affection, Care, Guidance, Reverence, Glory, Gratitude, Love. Understanding Harmony in Society, Vision for the Universal Human Order, Human Order Five Dimension.. Understanding Harmony in Nature, self-regulation &amp; mutual fulfillment among the Four orders of Nature, Realizing Existence as coexistence at all levels holistic perception of harmony in existence.</p> <p><b>List of Tutorial Assignments:</b></p> <p>Take any one environmental issue in your neighbourhood and try to find out the root cause of it. What exactly can you contribute as an individual to the solution ? In your opinion, is any sustainable environmental recovery possible without sustainable effort for right understanding and right feeling in every human being ? Update your future resume to address the section on the environment with your commitment and ideas for it.</p>

**With effect from the A.Y. 2025-26**

<b>03132XX: Community Engagement project</b>		
<b>Teaching Scheme:</b> P: 2 Hrs./ Week	<b>Credits: 01</b>	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<p><b>Prerequisite:</b> Basic understanding of social and ethical responsibilities. Teamwork and communication skills acquired in prior coursework or group activities. Familiarity with problem-solving methodologies and project planning.</p>		
<p><b>Course Objectives:</b> Course intends to prepare the students</p> <ol style="list-style-type: none"> <li>1. Opportunities to engage with their local community, fostering empathy, teamwork, and problem-solving skills while contributing positively to their surroundings.</li> <li>2. An understanding of the challenges faced by the local community and the role of engineering in addressing those challenges.</li> <li>3. The ability to apply technical knowledge and skills to design solutions or interventions that create a positive impact on the community.</li> <li>4. The skills to evaluate and critically analyze the outcomes of their engagement activities, deriving actionable insights for sustainable impact.</li> </ol>		
<p><b>Course Outcomes:</b> At the end of the Course Students will be able to</p> <ol style="list-style-type: none"> <li>1. <b>Identify and Analyze</b> community needs and challenges by engaging with stakeholders and evaluating real-world problems. (Remembering &amp; analyzing)</li> <li>2. <b>Design and Implement</b> practical, creative, and context-specific solutions using engineering principles to address community issues. (Creating &amp; applying)</li> <li>3. <b>Reflect and Evaluate</b> the effectiveness of their interventions and articulate lessons learned through reports and presentations. (Evaluating &amp; Understanding)</li> </ol>		
<p><b>Guidelines</b></p> <p>A. Group Formation:</p> <ul style="list-style-type: none"> <li>• Form a group of 3-4 students that share a similar interest in each batch, Duration: 24 hours (divided into manageable sessions or shifts).</li> <li>• The group should be cohesive, sharing, caring, and contribute to the task assigned.</li> <li>• The tasks carried out need to be maintained in the LOG book by each group.</li> </ul> <p>B. Project Scope: The CEP should focus on addressing a specific community or societal issue. Projects may fall under the following themes:</p> <ol style="list-style-type: none"> <li>1. Education and Awareness: Conduct workshops or awareness drives on topics like digital literacy, environmental sustainability,</li> </ol>		

mental health, or career planning for local stakeholders.

2. **Technology for Social Good:**  
Develop a simple prototype or solution that addresses a real-world problem (e.g., a water-saving device, simple mobile apps, or tools for community use).
  3. **Environmental Sustainability:**  
Organize clean-up drives, tree plantations, recycling campaigns, or energy conservation initiatives.
  4. **Health and Wellness:**  
Promote health through awareness programs on hygiene, nutrition, and exercise.
  5. **Skill Development:**  
Teach basic computer or technical skills to students, staff, or the community.
- C. **Step-by-Step Execution Plan:**
1. **Planning Phase:**
    - **Team Formation:**  
Form teams of 3-4 students with a balance of skills and interests.
    - **Project Selection:**  
Choose a project theme and define a clear objective that aligns with community needs.
    - **Proposal Submission:**  
Submit a one-page project proposal outlining:  
Title of the project.  
Objective and expected outcome.  
Plan of execution (timeline and activities).  
Required resources (if any).  
Get approval from the designated faculty mentor.
  2. **Execution Phase (24 Hours):**
    - **Day 1 Activities (First 12 Hours):**  
Conduct initial outreach and engage with the community or target participants.  
Implement planned activities with close teamwork and documentation.
    - **Day 2 Activities (Second 12 Hours):**  
Continue engagement and collect feedback from the participants.  
Begin summarizing the outcomes of the project.  
**Best Practices:**  
Maintain a positive attitude and open communication with the community.  
Respect cultural norms and values of the participants.  
Adapt your plan based on real-time needs or challenges.
  3. **Reporting Phase:**
    - **Documentation:**  
Create a detailed report containing:  
Title, objective, and scope of the project.  
Activities conducted and timeline.  
Outcomes and community feedback.  
Photos/videos of the activities (if permitted).  
Challenges faced and how they were addressed.
    - **Presentation:**  
Each team will present their project to a panel of faculty members or peers, showcasing their efforts and outcomes.

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

Duration of presentation: 5-7 minutes per team.

### D. Evaluation Criteria:

Projects will be evaluated based on:

- Relevance: How well the project aligns with community needs.
- Impact: The tangible and intangible benefits delivered to the community.
- Innovation: Creativity in the approach or solution provided.
- Teamwork: Collaboration and effective delegation within the group.
- Documentation & Presentation: Clarity, depth, and overall delivery of the report and presentation.

### E. Guidelines for Conduct:

- Behavior: Students should display professionalism, punctuality, and respect.
- Safety: Follow all safety protocols during on-campus or fieldwork activities.
- Feedback: Collect feedback from participants to measure the success and identify areas for improvement.

### F. Support and Supervision:

- Faculty mentors will be assigned to each group to guide them throughout the project.
- A resource or helpdesk will be available for logistical or technical support.

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

<b>03132XX: Field Project (FP)</b>		
<b>Teaching Scheme:</b> P: 2 Hrs./ Week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<b>Prerequisite:</b> Basic understanding of core engineering concepts relevant to the chosen field of work. Knowledge of teamwork, communication, and project planning. Awareness of safety protocols and ethical considerations for fieldwork.		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"><li>1. Hands-on, real-world experience in applying engineering concepts through practical problem-solving and teamwork.</li><li>2. The ability to analyze real-world field situations by identifying key challenges and requirements.</li><li>3. The skills to apply engineering knowledge, tools, and techniques to develop effective solutions.</li><li>4. The capability to critically evaluate their fieldwork outcomes in terms of impact, feasibility, and sustainability.</li></ol>		
<b>Course Outcomes:</b> <b>At the end of the Course Students will be able to</b> <ol style="list-style-type: none"><li>1. Assess field conditions and identify problems through observation and interaction with stakeholders. (Analyzing &amp; remembering).</li><li>2. Develop and execute a practical, field-based solution or prototype aligned with the identified needs. (Creating &amp; applying).</li><li>3. Reflect on and evaluate the project outcomes in terms of their technical, social, and ethical impact. (Evaluating &amp; Understanding).</li></ol>		
<b>Guidelines</b>		
<p>A. Group Formation:</p> <ul style="list-style-type: none"><li>• Form a group of 3-4 students that share a similar interest in each batch, Duration: 24 hours (divided into manageable sessions or shifts).</li><li>• The group should be cohesive, sharing and caring, contribute to the task assigned. The task carried out need to be maintained in the LOG book by each group.</li></ul> <p>B. Field Project Execution Guidelines</p> <ol style="list-style-type: none"><li>1. Team Formation and Topic Selection: Students form groups of 3-4. Select a project aligned with an engineering problem or theme, such as:<ul style="list-style-type: none"><li>• Environmental monitoring and solutions.</li><li>• Designing small-scale engineering systems.</li><li>• Infrastructure or community development.</li><li>• Renewable energy solutions.</li></ul></li></ol>

### 2. Proposal Submission:

Prepare a proposal that includes:

- Project title and objectives.
- Problem statement and proposed solution.
- Field location and timeline.
- Required resources.

Obtain faculty mentor approval.

### 3. Fieldwork (24 Hours):

- Conduct site visits, data collection, and stakeholder interactions.
- Design or develop the solution based on field observations.
- Ensure proper documentation of all activities.

### 4. Reporting and Presentation:

Prepare a detailed report with:

- Objectives, methodology, and field observations.
- Design, implementation, and results.
- Challenges faced and lessons learned.
- Present the report and findings to faculty and peers.

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

<b>03132XX: Co-curricular Activity (CCA)</b>		
<b>Teaching Scheme:</b> P: 2 Hrs./ Week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<b>Prerequisite:</b> Basic understanding of core engineering concepts relevant to the chosen field of work. Knowledge of teamwork, communication, and project planning. Awareness of safety protocols and ethical considerations for fieldwork.		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"><li>1. An opportunity to acquire skills and competencies beyond the core curriculum.</li><li>2. A foundation for holistic personality development.</li><li>3. Preparation for future academic, professional, and personal growth.</li></ol>		
<b>Course Outcomes:</b> <b>At the end of the Course Students will be able to</b> <ol style="list-style-type: none"><li>1. Demonstrate the ability to lead and participate in teams.</li><li>2. Develop several important life skills such as leadership, organization, confidence, time management, and socialization.</li><li>3. Improve self-confidence and decision-making abilities.</li><li>4. Experience the importance of community involvement.</li></ol>		
<b>Guidelines for Co-curricular Activities</b>		
As part of the implementation of autonomy effective from Academic Year 2025-26 for the UG Co-curricular activities are included as credit courses in the curriculum. Accordingly, the number of credits is incorporated in the curriculum structure.		
<b>BACKGROUND</b>		
SCTR's Pune Institute of Computer Technology believes in holistic development of students catering to the requirements of engineering attributes (program outcomes) prescribed by Washington Accord and NBA through the implementation of Outcome Based Education. There is a limited scope of attaining all the program outcomes through classroom and laboratory teaching learning process. To expand the scope of learning to acquire all the attributes, PICT proposes to institutionalize and formalize the ongoing extra and co-curricular activities which are being carried out by students by awarding due credits and a certificate at the time of their graduation in addition to the University degree certificate. The purpose of extracurricular activities is primarily the acquisition of skills and competencies in areas that are not directly part of the curriculum.		
<b>SCOPE</b>		
Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the normal academics of college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the normal academics of		

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some of the credits are included in the curriculum as mandatory for CCA. CC Activities Include but not limited to Community Service Organizations (NCC,NSS), Cultural / Ethnic Organizations, Engineering Academic Honor Societies, Engineering Clubs/ Organizations, Orientation Programs, Health Related Organizations, Professional Engineering Societies – Student Chapters, Research( Voluntary Basis), Sports, educational activities that include, seminars, workshops, project competitions, hackathons, debate competitions, and mathematics, robotics, and engineering teams and contests.

A student can earn two credits per year and a maximum of 8 credits in 4 years. The activity hours accumulated throughout the year shall be calculated by the Co-Curricular Activity Committee (CCAC) to fix the number of credits to be granted to students at the end of the year. (Note: 30 hours =1credit)

### MODE OF IMPLEMENTATION

1. A committee called Co-Curricular Activity Committee (CCAC) consisting of Dean Student Affairs and all the functional in-charges of various activities shall facilitate the activities.
2. Identification and inclusion of Co-Curricular Activities to be considered for the Credit System.
3. Mapping each activity to the program outcomes, design the assessment methodology.
4. Define the scope, methodology, number of hours required of each activity.
5. Announcement of activity calendar.
6. Registration and enrollment of interested students.
7. Allocation of faculty mentors to interested students based on the activity and expertise/interest.
8. Carry out the activities, submission of weekly reports in the form of a logbook.
9. Submission of detailed report in prescribed format mentioning all the activities carried out along with certificates, mementoes, photographs etc.
10. The Evaluation is continuous with a CIE of total 25 Marks.

### LIST OF VARIOUS CO-CURRICULAR ACTIVITIES

- |   |   |
|---|---|
| 1. Art Circle                           | 18. Competitive Examination and Guidance Cell |
| 2. ADDICTION- Annual Social Gathering   | 19. Impetus & Concepts (INC)                  |
| 3. Sports                               | 20. TechFiesta (PICT International Hackathon) |

<b>1403107: Database Management System</b>		
<b>Teaching Scheme:</b> L: 03 Hrs./Week	<b>Credits: 03</b>	<b>Examination Scheme:</b> CIE: 20 Marks ISE: 20 Marks ESE: 60 Marks
<b>Prerequisite:</b> Discrete Mathematics, Data Structures		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>To understand the fundamental concepts of database management like database design and database languages.</li> <li>To learn SQL and NoSQL concepts through database management tools.</li> <li>To get familiar with the basics of transaction management and concurrency control.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the Course Students will be able to</b> <ol style="list-style-type: none"> <li><b>Design</b> an E-R Model for the given requirements and convert into normalized database tables.</li> <li><b>Write</b> SQL queries and PL/SQL code for given requirements.</li> <li><b>Illustrate</b> NoSQL database concepts and write queries using MongoDB.</li> <li><b>Describe</b> database transaction management concepts.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Introduction to Databases and Database Design</b>	<b>10 Hrs.</b>
	<b>Introduction:</b> Need for Database Management Systems, Evolution, Database System Concepts, and Architecture. <b>Data Modeling:</b> Entity Relationship (ER) Model, Relational Model, Extended ER Model, converting ER and EER diagram into tables. <b>Database Design:</b> Codd's Rules, Need of Normalization, Functional Dependencies, Inference Rules, Functional Dependency Closure, Decomposition Properties, Normal Forms: 1NF, 2NF, 3NF, and BCNF.	
<b>Module II</b>	<b>SQL and PL/SQL</b>	<b>7 Hrs.</b>
	SQL Characteristics and Advantages, Data Types and Literals, DDL, DML, Select Queries and clauses, SQL Operators, Functions, Aggregate Functions, Nested queries, Join Queries, <b>Views:</b> Creating, Dropping, Updating, Index and Sequence in SQL, DCL, TCL, <b>PL/SQL:</b> Procedure, Function, Cursors, Trigger.  <b>Suggested list of Assignments:</b> <ol style="list-style-type: none"> <li>Use an open source database tool to implement a structured database system for a Retail Store to manage products, customers and orders. Write SQL queries to perform DDL operations for table creation in the Retail Store database with constraints (Not Null, Primary, Foreign etc) and Modification using Alter</li> </ol>	

	<p>command variations, and also perform basic DML operations (Insert, Select, Update, Delete), and executing various Select statement queries with different clauses for given schemas of Retail Store database..</p> <p>2. An University maintains a structured database to manage student enrollments, courses, instructors and departments. Write SQL queries using various JOIN types (Natural, Inner, Equi, Non-Equi, Outer, Left Outer, Right Outer), as well as Subqueries and Views to extract insights from the university database system.</p> <p>3. A Bank wants to automate its customer credit scoring system based on their financial standing. Let the credit score be computed on a scale of 0 to 5 by a PLSQL function based on the account balance and loan amount of any customer. (hint: if loan_amount is 50% of account balance then, credit_score:</p> <p>Customer(Cust_name, AccNo, Balance, city)</p> <p>Loan(Loan_no, branch_name, Amount)</p> <p>Borrower(Cust_name, Loan_no, CreditScore).</p> <p>4. A Company wants to track employee salary changes, maintain company-wide statistics, and log employment history efficiently using row-level triggers. Implement BEFORE and AFTER triggers on EMPLOYEE, COMPANY_INFO, and EMP_LOG tables using INSERT, UPDATE and DELETE operations.</p> <p>EMPLOYEE(Emp_Id, First_Name, Last_Name, Email, Phone_No, Hire_Date, Job_Profile, Salary, HRA)</p> <p>COMPANY_INFO(Emp_Count, Total_Salary_Expenses)</p> <p>EMP_LOG(Emp_Id, Old_Salary, New_Salary, Edit_Time, Job_Status)</p>	
<p><b>Module III</b></p>	<p><b>NoSQL Databases</b></p>	
	<p>Introduction to NoSQL Databases, Types of NoSQL Databases, BASE properties, CAP Theorem, Comparative study of RDBMS and NoSQL, MongoDB (syntax and usage): CRUD Operations, Indexing, Aggregation, MapReduce.</p> <p><b>Suggested list of Assignments:</b></p> <p>1. An institute maintains details of all teachers, including name, qualifications, department details, experience, salary structure, date of joining, appointment_nature and area of expertise. Design and implement MongoDB queries to perform CRUD operations on the teachers collection for various administrative tasks. Create the above collection, insert suitable documents and design updation and retrieval queries requiring comparison and logical operators,save() method, etc.</p>	<p align="center"><b>7 Hrs.</b></p>

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

	<p>2. Customers of an online marketplace frequently search for products and their orders, and the search becomes slow as the products and orders grow. Implement all types of indexes on the products and order MongoDB collections.</p> <p>3. The University wants to analyze course enrollments, faculty performance and student achievements using MongoDB aggregation pipelines. The university maintains a “courses” collections, which includes:</p> <p>Course details (title, department, credit hours, instructor)</p> <p>Student enrollments (student names, scores, pass/fail status)</p> <p>Faculty details (experience, designation, department)</p> <p>Design and implement aggregation queries to generate various reports using multiple aggregation stages with the given collection in MongoDB.</p> <p>Design and implement aggregation queries requiring various stages with a suitable collection using MongoDB.</p> <p>4. Implement various database operations through suitable programming language.</p>	
<b>Module IV</b>	<b>Database Transactions</b>	<b>7 Hrs</b>
	<p>Introduction to query processing, basic concepts of a Transaction, ACID Properties, State diagram, Concept of Schedule, Serializability – Conflict and View, Concurrency Control Protocols-Lock based and timestamp-based protocols, Recovery techniques.</p>

<b>1403108: Operating Systems</b>		
<b>Teaching Scheme:</b> L: 02 Hrs./week	<b>Credits: 02</b>	<b>Examination Scheme:</b> CIE: 20 Marks ISE: 20 Marks ESE: 60 Marks
<b>Prerequisite:</b> Computer Fundamentals		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>1. To understand internals and functioning of OS.</li> <li>2. To study organization of data and I/O devices in OS.</li> <li>3. To understand the mechanism of interacting user space applications with kernel space, Linux system calls.</li> <li>4. To learn different constructs of shell scripting.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li>1. <b>Analyse</b> various strategies of Process and Memory management in OS.</li> <li>2. <b>Compare</b> different file systems and device management methods.</li> <li>3. <b>Develop</b> applications using system calls and containerization.</li> <li>4. <b>Write</b> shell scripts for managing users and resources.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Introduction, Process and Memory Management</b>	<b>10 Hrs.</b>
	<p><b>Introduction:</b> Introduction to Operating Systems, definition, functions, and types of operating systems, OS Structure: Monolithic, Microkernels, Layered, Modular, and Hybrid systems, OS Services, and Design, Modern Operating Systems and Concepts like containerization, virtualization and Docker.</p> <p><b>Process Management:</b> Process Concept: States, Process Control Block (PCB),  <b>Multithreading:</b> Threads, User vs Kernel Threads, CPU Scheduling: Scheduling Criteria, Types of Schedulers, Scheduling Algorithms: FCFS, SJF, Priority, Round-Robin, Inter-process Communication (IPC): Process Synchronization, Critical Section Problem, Semaphores, and Monitors, Philosophers), Deadlock: Detection, Prevention, and Recovery. Multi threaded echo server.</p> <p><b>Memory Management:</b> Memory Management Requirements, Memory Partitioning, and Virtual memory , Placement Algorithms: First Fit, Best Fit, Worst Fit, Paging, Page replacement algorithms: FIFO, LRU, OPTIMAL, Segmentation.</p> <p><b>Assignment 1:</b> Containerization of a Web Application using Docker</p>	

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

	<p><b>Objective:</b> Containerize a simple web application using Docker, understand the container lifecycle, and explore best practices for optimizing containerized deployments.</p> <p><b>Problem Statement:</b> Develop a lightweight and portable web application that needs to run consistently across multiple environments (development, testing, and production). Following are the functionalities you need to perform:</p> <ol style="list-style-type: none"> <li>1. Containerize a simple Python Flask web application using Docker.</li> <li>2. Ensure that the application runs consistently across different environments.</li> <li>3. Optimize the container by reducing image size and improving performance.</li> <li>4. Deploy and manage the container using essential Docker commands.</li> </ol>	
<p align="center"><b>Module II</b></p>	<p><b>File Systems and Device Management</b></p>	<p align="center"><b>8 Hrs.</b></p>
	<p><b>File Systems:</b> Overview, File Organization and Access, File Directories, File Sharing, Record Blocking, Secondary Storage Management, File System Security, UNIX File System, Linux Virtual File System, Windows File System, Case studies of advanced file systems (ext4, ZFS, Btrfs).</p> <p><b>Device Management:</b> I/O Devices, Organization of the I/O Function, Operating System Design Issues, I/O Buffering, I/O hub, Disk Scheduling Policies: FIFO, PRIORITY, SSTF, SCAN, C-SCAN, Linux I/O, Windows I/O.</p> <p><b>Assignment 2:</b> Microkernel Simulation</p> <p><b>Objective:</b> Write a simple microkernel simulation using C/Python to:</p> <ol style="list-style-type: none"> <li>1. Handle messages passing between system services.</li> <li>2. Simulate basic IPC (Inter-Process Communication).</li> <li>3. Run the program and demonstrate IPC functionality.</li> </ol>	
<p align="center"><b>Module III</b></p>	<p><b>Systems Calls Design and Implementation</b></p>	<p align="center"><b>8 Hrs.</b></p>
	<p><b>Introduction to System Calls:</b> Definition of system calls and their role in the OS, Differences between user mode and kernel mode, Overview of the system call interface</p> <p>Mechanisms of System Calls: Working of a system call (traps, interrupts), Transition from user mode to kernel mode, Context switching and its overhead.</p> <p><b>Types of System Calls: Process Control:</b> Creating and terminating processes (fork, exec, exit), Process synchronization (wait, signal), Process scheduling and priority management.</p> <p><b>File:</b> File creation, deletion, and manipulation (open, read, write, close), File attributes and permissions, Directory operations (mkdir, rmdir, chdir).</p> <p><b>Error Handling:</b> Common errors encountered with system calls, Error codes and how to interpret them, Best practices for robust error handling.</p>	

	<p><b>Assignment 3:</b> GRUB Configuration &amp; Hard Disk Partitioning, SSD  <b>Problem Statement:</b> Your organization is setting up a multi-boot environment with Linux and Windows, requiring proper GRUB configuration and disk partitioning for smooth operation. You have been assigned to:</p> <ol style="list-style-type: none"> <li>1. Analyze the GRUB boot process and its role in loading the OS.</li> <li>2. Customize the GRUB menu, setting the default OS, timeout, and adding custom boot parameters.</li> <li>3. Simulate a boot failure scenario and apply recovery techniques to restore GRUB.</li> <li>4. Partition a hard disk, implementing best practices for Linux installation, including swap space and EFI partition.</li> <li>5. Perform a dual-boot setup with Linux and Windows, ensuring proper bootloader functionality.</li> <li>6. Document troubleshooting steps for common GRUB issues, such as missing entries or boot loops.</li> </ol>	
<p><b>Module IV</b></p>	<p><b>Shell Scripting</b></p>	<p align="center"><b>8 Hrs.</b></p>
	<p><b>Introduction to Shell Scripting:</b> Overview of shell scripting and its purpose, Types of shells (e.g., Bash, Zsh, Ksh, Csh), Differences between command line and shell scripts.</p> <p><b>Basic Shell Commands:</b> Common Unix/Linux commands (ls, cp, mv, rm, cat, echo), Command-line arguments and options, Understanding standard input, output, and error streams.</p> <p><b>Writing First Shell Script:</b> Script structure and syntax, Creating and executing a simple shell script, Using the shebang (#!/) for specifying the interpreter. User management.</p> <p><b>Variables and Data Types:</b> Declaring and using variables, Variable scope and export, Special variables</p> <p><b>Control Structures:</b> Conditional statements (if, else, elif, case), Looping constructs (for, while, until), Using break and continue in loops.</p> <p><b>Functions:</b> Defining and calling functions, Passing arguments to functions, Returning values from functions.</p> <p><b>Input and Output:</b> Reading user input with read, Redirecting input and output, using pipes to connect commands.</p>

**Credits:** 01

**Examination Scheme:**

CIE(TW): 25 Marks

ESE(OR): 25 Marks

**Prerequisite:** Fundamentals of programming

**Course Objectives:**

**Course intends to prepare the students**

1. To learn process and memory management techniques.
2. To learn disk scheduling and internals of storage management.
3. To know the usage of various system calls.
4. To understand shell scripting.

**Course Outcomes:**

**At the end of the course students will be able to**

1. **Implement** and **analyse** different scheduling algorithms FCFS,SJF,RR and priority.
2. **Apply** different memory placement and replacement strategies for a given input requirements.
3. **Demonstrate** various internals of the Linux file system.
4. **Write** the shell scripts to manage the users and access rights.

**List of Assignments**

1. **Assignment 1:** Containerization of a Web Application using Docker  
**Objective:** Containerize a simple web application using Docker, understand the container lifecycle, and explore best practices for optimizing containerized deployments.  
**Problem Statement:** Develop a lightweight and portable web application that needs to run consistently across multiple environments (development, testing, and production).  
 Following are the functionalities you need to perform:
  - i. Containerize a simple Python Flask web application using Docker.
  - ii. Ensure that the application runs consistently across different environments.
  - iii. Optimize the container by reducing image size and improving performance.
  - iv. Deploy and manage the container using essential Docker commands.
2. **Assignment 2:** Microkernel Simulation  
**Objective:** Write a simple microkernel simulation using C/Python to:
  - i. Handle message passing between system services.
  - ii. Simulate basic IPC (Inter-Process Communication).
  - iii. Run the program and demonstrate IPC functionality.
3. **Assignment 3:** GRUB Configuration & Hard Disk Partitioning.  
**Problem Statement:** Your organization is setting up a multi-boot environment with Linux and Windows, requiring proper GRUB configuration and disk partitioning for smooth operation. You have been assigned to:

<b>1403210: Database Management System Lab</b>		
<b>Teaching Scheme:</b> P: 04 Hrs./week	<b>Credits: 02</b>	<b>Examination Scheme:</b> CIE(TW): 25 Marks ESE(PR): 25 Marks
<b>Prerequisite:</b> Database Management System		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"> <li>To develop skills to handle SQL databases and implement PL/SQL code.</li> <li>To develop skills to handle NoSQL databases.</li> <li>To execute the process of software application development.</li> </ol>		
<b>Course Outcomes:</b> <b>At the end of the course students will be able to</b> <ol style="list-style-type: none"> <li><b>Implement</b> the given relational schema, database queries, and PL/SQL programs for 2-tier architecture using MySQL.</li> <li><b>Implement</b> NoSQL queries and aggregate functions for given requirements using MongoDB.</li> <li><b>Develop</b> database applications using database connectivity.</li> </ol>		
<b>List of Assignments</b>		
1.	Use an open source database tool to implement a structured database system for a Retail Store to manage products, customers and orders. Write SQL queries to perform DDL operations for table creation in the Retail Store database with constraints (Not Null, Primary, Foreign etc) and Modification using Alter command variations, and also perform basic DML operations (Insert, Select, Update, Delete), and executing various Select statement queries with different clauses for given schemas of Retail Store database.	
2.	An University maintains a structured database to manage student enrollments, courses, instructors and departments. Write SQL queries using various JOIN types (Natural, Inner, Equi, Non-Equi, Outer, Left Outer, Right Outer), as well as Subqueries and Views to extract insights from the university database system.	
3.	A Bank wants to automate its customer credit scoring system based on their financial standing. Let the credit score be computed on a scale of 0 to 5 by a PLSQL function based on the account balance and loan amount of any customer. (hint: if loan_amount is 50% of account balance then, credit_score: 3). Write a stored procedure that uses a cursor and calls the function with each customer name for computing credit scores of all bank customers. Customer(Cust_name, AccNo, Balance, city) Loan(Loan_no, branch_name, Amount) Borrower(Cust_name, Loan_no, CreditScore)	
4.	A Company wants to track employee salary changes, maintain company-wide statistics, and log employment history efficiently using row-level triggers. Implement BEFORE and AFTER triggers on EMPLOYEE, COMPANY_INFO, and EMP_LOG tables using INSERT, UPDATE and	

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43****Second Year B. Tech. Curriculum****With effect from the A.Y. 2025-26**

	DELETE operations. EMPLOYEE(Emp_Id, First_Name, Last_Name, Email, Phone_No, Hire_Date, Job_Profile, Salary, HRA) COMPANY_INFO(Emp_Count, Total_Salary_Expenses) EMP_LOG(Emp_Id, Old_Salary, New_Salary, Edit_Time, Job_Status)
5.	An institute maintains details of all teachers, including name, qualifications, department details, experience, salary structure, date of joining, appointment_nature and area of expertise. Design and implement MongoDB queries to perform CRUD operations on the teachers collection for various administrative tasks. Create the above collection, insert suitable documents and design updation and retrieval queries requiring comparison and logical operators, save() method, etc.
6.	Customers of an online marketplace frequently search for products and their orders, and the search becomes slow as the products and orders grow. Implement all types of indexes on the products and order MongoDB collections.
7.	The University wants to analyze course enrollments, faculty performance and student achievements using MongoDB aggregation pipelines. The university maintains a “courses” collections, which includes: Course details (title, department, credit hours, instructor) Student enrollments (student names, scores, pass/fail status) Faculty details (experience, designation, department) Design and implement aggregation queries to generate various reports using multiple aggregation stages with the given collection in MongoDB.
8.	Implement various database operations through suitable programming language.

<b>1407201: Project Based Learning</b>		
<b>Teaching Scheme:</b> P: 04 Hrs./week	<b>Credits: 02</b>	<b>Examination Scheme:</b> ESE(OR) : 50 Marks

**Prerequisite:** 1. Basic Subject Knowledge: Foundational understanding of the technology stack  
2. Design thinking lab

**Course Objectives:**

**Course intends to prepare the students**

1. To emphasize learning activities that are long-term, interdisciplinary and student-centric.
2. To inculcate independent learning by problem-solving with social context.
3. To engage students in rich and authentic learning experiences.
4. To provide every student the opportunity to get involved either individually or as a group so as to develop team skills and learn professionalism.

**Course Outcomes:**

**At the end of the course students will be able to**

1. **Understand** project lifecycle with relevance to real-world issues.
2. **Apply** development /design skills in the project in a practical context.
3. **Analyze** different complex problem breakdown processes.
4. **Assess** the effectiveness of the methods being used throughout the project.
5. **Design and develop** a comprehensive project that addresses a specific societal need.

**Suggested Problem Statements(Not limited to this choose any)**

Sr No	Domain	Sample Problem Statement
1	Waste Management Optimization	Inefficient waste collection leads to overflowing bins and increased pollution.
2	Renewable Energy Monitoring	Limited visibility on renewable energy production affects efficiency.
3	Urban Air Quality Monitoring	Poor air quality in urban areas poses health risks.
4	Water Quality Testing	Contaminated water sources threaten public health.
5	Smart Traffic Lights	Traffic congestion causes delays and pollution.
6	Elderly Care Monitoring System	Elderly individuals living alone face health risks and emergencies.

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

7	Food Safety Tracking	Problem: Foodborne illnesses due to unsafe food handling practices.
8	Energy Consumption Management	Problem: High energy consumption leads to increased costs and carbon footprint.
9	Disaster Response App	Problem: Ineffective communication during natural disasters.
10	Personalized Learning Tools	Problem: One-size-fits-all education fails to meet diverse student needs.

### Indicative/ Sample List of Tools (Students are allowed to use any latest tools / Not Limited to this):

1. Git/GitHub - Version control and collaboration.
2. Visual Studio Code - Integrated development environment (IDE).
3. AWS/Google Cloud/Azure - Cloud computing platforms.
4. TensorFlow/PyTorch/Scikit-learn - Machine learning libraries.
5. React/Angular/Django - Web development frameworks.

<b>List of Assignments</b>		
1.	Create a report explaining key factors influencing the success or failure of market entry strategies for new entrepreneurs.	
2.	Create and Present Your Own Business Model Canvas to outline the critical components: Value Proposition, Customer Segments, Channels, Customer Relationships, Revenue Streams, Key Resources, Key Activities, Key Partnerships, and Cost Structure.	
3.	Create and Present a report of your own business with an analysis of the business's impact on local economics, considering both positive and negative externalities, and proposing strategies for improvement.	

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

<b>0408203: Collaborative Skills, Digital Ethics, and Cyber Security</b>		
<b>Teaching Scheme:</b> P: 02 Hrs./week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE(TW) : 25 Marks
<b>Prerequisite:</b> Professional Development and Career Readiness		
<p><b>Course Objectives:</b>  <b>Course intends to prepare the students</b></p> <ol style="list-style-type: none"> <li>1. Understand the significance of team skills and know how to acquire them.</li> <li>2. Design, develop, and adapt to situations as individuals and as team members.</li> </ol>		
<p><b>Course Outcomes:</b>  <b>At the end of the course students will be able to</b></p> <ol style="list-style-type: none"> <li>1. Empathize with and trust colleagues for improving interpersonal relations.</li> <li>2. Demonstrate effective communication by respecting diversity and embracing good listening skills.</li> <li>3. Distinguish the guiding principles for communication in a diverse, smaller, internal world.</li> <li>4. Practice interpersonal skills for better social and professional relations with seniors, juniors, peers, and stakeholders.</li> </ol>		
<b>Course Contents</b>		
<b>Expt. No</b>	<b>Title/Problem Statement</b>	<b>Hrs.</b>
1.	<b>Trust and Collaboration</b> Explain the Importance of Trust in Creating a Collaborative Team Agree to Disagree and Disagree to Agree – Spirit of Teamwork • Understanding Fear of Being Judged and Strategies to Overcome Fear	4 Hrs.
2.	<b>Listening as a Team Skill</b> Advantages of Effective Listening Listening as a Team Member and Team Leader. Use of active listening strategies to encourage sharing of ideas (full and undivided attention, no interruptions, no pre-think, use empathy, listen to tone and voice modulation, recapitulate points).	2 Hrs.
3.	<b>Brainstorming</b> Brainstorming as a Technique to Promote Idea Generation a. Brainstorming: Meaning and the Process b. Procedure for Conducting Brainstorming c. Importance of Using Brainstorming Technique d. Types of Brainstorming	2 Hrs.

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43****Second Year B. Tech. Curriculum****With effect from the A.Y. 2025-26**

4.	Learning and Showcasing the Principles of Documentation of Team Session Outcomes.	2 Hrs.
5.	<b>Social and Cultural Etiquette</b> Need for Etiquette (impression, image, earn respect, appreciation) <ul style="list-style-type: none"><li>• Aspects of Social and Cultural/Corporate Etiquette in Promoting Teamwork</li><li>• Importance of Time, Place, Propriety and Adaptability to Diverse Cultures</li></ul>	2 Hrs.
6.	<b>Digital Ethics</b> Digital Ethics i. Digital Literacy Skills, ii. Digital Etiquette, iii. Digital Life Skills	2 Hrs.
7.	<b>Cyber Security</b> The Art of Protecting Secrets a. Understanding Encryption and Decryption and Its Different Types b. Art of Data Masking c. Firewall and Its Proper Use in Cyber Protection	2 Hrs.

<b>0411102: Indian Constitution and Social Responsibility</b>		
<b>Teaching Scheme:</b> L: 01 Hrs./Week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE: 25 Marks
<b>Prerequisite:</b> Basic Knowledge of Civics and Governance, Ethical Reasoning and Social Awareness, Communication and Critical Thinking Skills.		
<p><b>Course Objectives:</b> Course intends to prepare the students</p> <ol style="list-style-type: none"> <li>1. An understanding of the principles of social responsibility, ethical citizenship, and the Indian Constitution.</li> <li>2. The ability to analyze the role of individuals and institutions in fostering responsible citizenship, democracy, and social change.</li> <li>3. Skills to evaluate ethical dilemmas and legal frameworks for making informed civic decisions.</li> <li>4. Opportunities to design initiatives that promote social responsibility and active community participation.</li> </ol>		
<p><b>Course Outcomes:</b> At the end of the course students will be able to</p> <ol style="list-style-type: none"> <li>1. Explain fundamental concepts of social responsibility, civic engagement, and constitutional law.</li> <li>2. Apply ethical and legal principles to address community and global issues.</li> <li>3. Analyze the relationship between fundamental rights, duties, and governance in India.</li> <li>4. Develop community-driven projects that contribute to sustainable development and civic well-being.</li> </ol>		
<b>Course Contents</b>		
<b>Module I</b>	<b>Introduction to Indian Constitution</b>	<b>10 Hrs.</b>
	Historical Background and Evolution of the Indian Constitution, Preamble and its significance, Fundamental Rights and Duties, Directive Principles of State Policy. <b>CIE Activities:</b> <ul style="list-style-type: none"> <li>• <b>Debate:</b> Relevance of Fundamental Rights in Contemporary India</li> <li>• <b>Case Study:</b> Landmark Supreme Court Judgments</li> </ul>	
<b>Module II</b>	<b>Government Structure &amp; Electoral System</b>	<b>10 Hrs</b>

**SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43**

**Second Year B. Tech. Curriculum**

**With effect from the A.Y. 2025-26**

	<p>Separation of Powers: Legislature, Executive, and Judiciary, Federalism: Centre-State Relations, Parliamentary vs. Presidential System, Election Commission and Electoral Reforms.</p> <p><b>CIE Activities:</b></p> <ul style="list-style-type: none"> <li>• <b>Mock Parliament Session</b></li> <li>• <b>Discussion:</b> Impact of Electoral Reforms on Indian Democracy</li> </ul>	
<b>Module III</b>	<b>Social Responsibility &amp; Citizenship</b>	<b>8 Hrs</b>
	<p>Definitions of Social Responsibility and Citizenship, Ethics and Moral Duties in Society, Individual vs. Collective Responsibility, Case Studies: Impactful Citizens and Social Movements.</p> <p><b>CIE Activities:</b></p> <ul style="list-style-type: none"> <li>• <b>Group Discussion:</b> What does responsible citizenship mean to you?</li> <li>• <b>Reflection Assignment:</b> Personal Social Responsibility</li> </ul>	
<b>Module IV</b>	<b>Civic Engagement &amp; Sustainable Development</b>	<b>8 Hrs</b>
	<p>Forms of Civic Engagement (Volunteering, Advocacy, Social Activism), Role of NGOs, Government, and Private Sectors, Sustainable Development Goals (SDGs), Corporate Social Responsibility (CSR).</p> <p><b>CIE Activities:</b></p> <ul style="list-style-type: none"> <li>• <b>Role-Playing Exercise:</b> Simulating a Town Hall Meeting</li> <li>• <b>Local Community Service Initiative</b></li> </ul>

<b>04132XX: Community Engagement project</b>		
<b>Teaching Scheme:</b> P: 2 Hrs./ Week	<b>Credits:</b> 01	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<p><b>Prerequisite:</b> Basic understanding of social and ethical responsibilities. Teamwork and communication skills acquired in prior coursework or group activities. Familiarity with problem-solving methodologies and project planning.</p>		
<p><b>Course Objectives:</b> Course intends to prepare the students</p> <ol style="list-style-type: none"> <li>1. Opportunities to engage with their local community, fostering empathy, teamwork, and problem-solving skills while contributing positively to their surroundings.</li> <li>2. An understanding of the challenges faced by the local community and the role of engineering in addressing those challenges.</li> <li>3. The ability to apply technical knowledge and skills to design solutions or interventions that create a positive impact on the community.</li> <li>4. The skills to evaluate and critically analyze the outcomes of their engagement activities, deriving actionable insights for sustainable impact.</li> </ol>		
<p><b>Course Outcomes:</b> At the end of the Course Students will be able to</p> <ol style="list-style-type: none"> <li>1. <b>Identify and Analyze</b> community needs and challenges by engaging with stakeholders and evaluating real-world problems. (Remembering &amp; analyzing)</li> <li>2. <b>Design and Implement</b> practical, creative, and context-specific solutions using engineering principles to address community issues. (Creating &amp; applying)</li> <li>3. <b>Reflect and Evaluate</b> the effectiveness of their interventions and articulate lessons learned through reports and presentations. (Evaluating &amp; Understanding)</li> </ol>		
<p><b>Guidelines</b></p> <p>A. Group Formation:</p> <ul style="list-style-type: none"> <li>• Form a group of 3-4 students that share a similar interest in each batch, Duration: 24 hours (divided into manageable sessions or shifts).</li> <li>• The group should be cohesive, sharing, caring, and contribute to the task assigned.</li> <li>• The tasks carried out need to be maintained in the LOG book by each group.</li> </ul> <p>B. Project Scope: The CEP should focus on addressing a specific community or societal issue. Projects may fall under the following themes:</p> <ol style="list-style-type: none"> <li>1. Education and Awareness: Conduct workshops or awareness drives on topics like digital literacy, environmental sustainability,</li> </ol>		

mental health, or career planning for local stakeholders.

2. Technology for Social Good:

Develop a simple prototype or solution that addresses a real-world problem (e.g., a water-saving device, simple mobile apps, or tools for community use).

3. Environmental Sustainability:

Organize clean-up drives, tree plantations, recycling campaigns, or energy conservation initiatives.

4. Health and Wellness:

Promote health through awareness programs on hygiene, nutrition, and exercise.

5. Skill Development:

Teach basic computer or technical skills to students, staff, or the community.

C. Step-by-Step Execution Plan:

1. Planning Phase:

• Team Formation:

Form teams of 3-4 students with a balance of skills and interests.

• Project Selection:

Choose a project theme and define a clear objective that aligns with community needs.

• Proposal Submission:

Submit a one-page project proposal outlining:

Title of the project.

Objective and expected outcome.

Plan of execution (timeline and activities).

Required resources (if any).

Get approval from the designated faculty mentor.

2. Execution Phase (24 Hours):

• Day 1 Activities (First 12 Hours):

Conduct initial outreach and engage with the community or target participants.

Implement planned activities with close teamwork and documentation.

• Day 2 Activities (Second 12 Hours):

Continue engagement and collect feedback from the participants.

Begin summarizing the outcomes of the project.

• Best Practices:

Maintain a positive attitude and open communication with the community.

Respect cultural norms and values of the participants.

Adapt your plan based on real-time needs or challenges.

3. Reporting Phase:

• Documentation:

Create a detailed report containing:

Title, objective, and scope of the project.

Activities conducted and timeline.

Outcomes and community feedback.

Photos/videos of the activities (if permitted).

Challenges faced and how they were addressed.

• Presentation:

Each team will present their project to a panel of faculty members or peers, showcasing their efforts and outcomes.

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

Duration of presentation: 5-7 minutes per team.

### D. Evaluation Criteria:

Projects will be evaluated based on:

- Relevance: How well the project aligns with community needs.
- Impact: The tangible and intangible benefits delivered to the community.
- Innovation: Creativity in the approach or solution provided.
- Teamwork: Collaboration and effective delegation within the group.
- Documentation & Presentation: Clarity, depth, and overall delivery of the report and presentation.

### E. Guidelines for Conduct:

- Behavior: Students should display professionalism, punctuality, and respect.
- Safety: Follow all safety protocols during on-campus or fieldwork activities.
- Feedback: Collect feedback from participants to measure the success and identify areas for improvement.

### F. Support and Supervision:

- Faculty mentors will be assigned to each group to guide them throughout the project.
- A resource or helpdesk will be available for logistical or technical support.

With effect from the A.Y. 2025-26

### 2. Proposal Submission:

Prepare a proposal that includes:

- Project title and objectives.
- Problem statement and proposed solution.
- Field location and timeline.
- Required resources.

Obtain faculty mentor approval.

### 3. Fieldwork (24 Hours):

- Conduct site visits, data collection, and stakeholder interactions.
- Design or develop the solution based on field observations.
- Ensure proper documentation of all activities.

### 4. Reporting and Presentation:

Prepare a detailed report with:

- Objectives, methodology, and field observations.
- Design, implementation, and results.
- Challenges faced and lessons learned.
- Present the report and findings to faculty and peers.

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

<b>04132XX: Co-curricular Activity</b>		
<b>Teaching Scheme:</b> P: 2 Hrs./ Week	<b>Credits: 01</b>	<b>Examination Scheme:</b> CIE(TW): 25 Marks
<b>Prerequisite:</b> Basic understanding of core engineering concepts relevant to the chosen field of work. Knowledge of teamwork, communication, and project planning. Awareness of safety protocols and ethical considerations for fieldwork.		
<b>Course Objectives:</b> <b>Course intends to prepare the students</b> <ol style="list-style-type: none"><li>1. An opportunity to acquire skills and competencies beyond the core curriculum.</li><li>2. A foundation for holistic personality development.</li><li>3. Preparation for future academic, professional, and personal growth.</li></ol>		
<b>Course Outcomes:</b> <b>At the end of the Course Students will be able to</b> <ol style="list-style-type: none"><li>1. Demonstrate the ability to lead and participate in teams.</li><li>2. Develop several important life skills such as leadership, organization, confidence, time management, and socialization.</li><li>3. Improve self-confidence and decision-making abilities.</li><li>4. Experience the importance of community involvement.</li></ol>		
<b>Guidelines for Co-curricular Activities</b>		
As part of the implementation of autonomy with effective from Academic Year 2025-26 for the UG Co-curricular activities are included as credit courses in the curriculum. Accordingly, the number of credits is incorporated in the curriculum structure.		
<b>BACKGROUND</b>		
SCTR's Pune Institute of Computer Technology believes in wholistic development of student catering to the requirements of engineering attributes (program outcomes) prescribed by Washington Accord and NBA through the implementation of Outcome Based Education. There is a limited scope of attaining all the program outcomes through classroom and laboratory teaching learning process. To expand the scope of learning to acquire all the attributes, PICT proposes to institutionalize and formalize the ongoing extra and co-curricular activities which are being carried out by students by awarding due credits and a certificate at the time of their graduation in addition to the University degree certificate. The purpose of extracurricular activities is primarily the acquisition of skills and competencies in areas that are not directly part of the curriculum.		
<b>SCOPE</b>		
Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the normal academics of college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the normal academics of		

# SCTR'S PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE-43

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some of the credits are included in the curriculum as mandatory for CCA. CC Activities Include but not limited to Community Service Organizations (NCC,NSS), Cultural / Ethnic Organizations, Engineering Academic Honor Societies, Engineering Clubs/ Organizations, Orientation Programs, Health Related Organizations, Professional Engineering Societies – Student Chapters, Research( Voluntary Basis), Sports, educational activities that include, seminars, workshops, project competitions, hackathons, debate competitions, and mathematics, robotics, and engineering teams and contests.

A student can earn two credits per year and a maximum of 8 credits in 4 years. The activity hours accumulated throughout the year shall be calculated by the Co-Curricular Activity Committee (CCAC) to fix the number of credits to be granted to students at the end of the year. (Note: 30 hours =1credit)

### MODE OF IMPLEMENTATION

1. A committee called Co-Curricular Activity Committee (CCAC) consisting of Dean Student Affairs and all the Functional In-charges of various activities shall facilitate the activities.
2. Identification and inclusion of Co-Curricular Activities to be considered for the Credit System.
3. Mapping each activity to the program outcomes, design the assessment methodology.
4. Define the scope, methodology, number of hours required of each activity.
5. Announcement of activity calendar.
6. Registration and enrollment of interested students.
7. Allocation of faculty mentors to interested students based on the activity and expertise/interest.
8. Carry out the activities, submission of weekly reports in the form of a logbook.
9. Submission of detailed report in prescribed format mentioning all the activities carried out [Min. 30 Hrs.] along with certificates, mementoes, photographs etc.
10. Continuous internal evaluation of 25 marks

### LIST OF VARIOUS CO-CURRICULAR ACTIVITIES

- |   |   |
|---|---|

## Structure of Multi-Disciplinary Minor Courses

The structure for the multidisciplinary Minor courses is as follows.

Sem			Teaching Scheme (Hours/Week)				Credits				Examination Scheme and Marks							
			Course code	Name of the Course (Short forms)	L	P	T	Total	L	P	T	Total	Theory			Practical		Total
													CIE	ISE	ESE	CIE	ESE	
													[20]	[20]	[60]	TW	(PR)	
3	03051X1	MDM-1	2	-	-	2	2	-	-	2	20	20	60	-	-	-	100	
3	03052X1	MDM-1 Tut	-	-	1	1	-	-	1	1	-	-	-	25	-	-	25	
4	04051X2	MDM-2	2	-	-	2	2	-	-	2	20	20	60	-	-	-	100	
4	04052X2	MDM-2 Lab	-	2	-	2	-	1	-	1	-	-	-	25	-	-	25	
5	05051X3	MDM-3	2	-	-	2	2	-	-	2	20	20	60	-	-	-	100	
5	05052X3	MDM-3 Lab	-	2	-	2	-	1	-	1	-	-	-	25	-	-	25	
6	06051X4	MDM-4	2	-	-	2	2	-	-	2	20	20	60	-	-	-	100	
6	06052X4	MDM-4 lab	-	2	-	2	-	1	-	1	-	-	-	25	-	-	25	
8	08053X5	MDM-5	-	-	2	2	-	-	2	2	-	-	-	50	-	-	50	
<b>Total</b>			<b>8</b>	<b>6</b>	<b>3</b>	<b>17</b>	<b>8</b>	<b>3</b>	<b>3</b>	<b>14</b>	<b>80</b>	<b>80</b>	<b>240</b>	<b>150</b>	<b>0</b>	<b>0</b>	<b>550</b>	

**Note:** In course code X is basket number. #: is laboratory or tutorial as per course requirements.

1. Students are instructed to select one basket labeled as MD-1 to MD-9 based on applicable criteria in the last column of the table below.
2. Follow the registration process initiated by the institute/ department.
3. Once the course is registered, change of the basket/course in any of the further semester is not allowed.
4. The total credits will be the same for all the courses except MDM-5.
5. Departments may conduct MDM-5 in virtual mode for the smooth conduction of internship for the full duration.

## Annexure -2

### Guidelines for Open elective Courses

- Open Elective – I will be offered in third semester as foreign language as prescribed in the structure.
- Open Electives – II, III, IV will be offered through SWAYAM/NPTEL MOOCs of Equivalent Credits.
- Departments will prepare the baskets/list of courses to be offered at the start of every semester, Students may choose any one course from the basket with adhering to any one stream.
- Department shall appoint a faculty mentor to ensure monitoring and course registration smoothly. The load for faculty should be reflected in time table.
- Equivalent Teaching Scheme, credits and examination schemes are detailed in table below.
- End semester Evaluation: No separate examination is conducted by the institute.

			Teaching Scheme (Hours/Week)				Credits				Examination Scheme and Marks						
Sem	Course code	Name of the Course	L	P	T	Total	L	P	T	Total	Theory			Practical			Total
											CIE	ISE	ESE	CIE	ESE		
											[20]	[20]	[60]	TW	P	OR	
3	OE-I	Foreign Language Studies (FLS)	-	-	2	2	-	-	2	2	-	-	-	50	-	-	50
4	OE-II	MOOCs	-	-	2	2	-	-	2	2	-	-	50	-	-	-	50
5	OE-III	MOOCs	-	-	2	2	-	-	2	2	-	-	50	-	-	-	50
6	OE-IV	MOOCs	-	-	2	2	-	-	2	2	-	-	50	-	-	-	50

## Second Year B. Tech. Curriculum

With effect from the A.Y. 2025-26

### Guidelines for MOOCs

1. The department shall release a list of approved SWAYAM-NPTEL courses before the commencement of every semester.
2. Students shall register for the approved Courses as per the schedule announced by SWAYAM-NPTEL.
3. A student shall undergo the courses only from the list notified by the department through SWAYAM/NPTEL platform and complete all the assignments and examination requirements as specified by SWAYAM/NPTEL.
4. SWAYAM-NPTEL Courses are considered for transfer of credits only if the student concerned has successfully completed and obtained the SWAYAM-NPTEL Certificate.
5. The credit equivalence for SWAYAM-NPTEL Courses: 12 weeks – 3 credits; 8 weeks – 2 credits; 4 weeks – 1 credit.
6. Equivalent marks will be considered for awarding the grades as specified in examination rules and regulations. The weightage for assignments is 40%, while the weightage for the proctored examination will be 60% for award calculating SGPA/CGPA. Students must score a minimum of 40% of the total marks by combining both assignments and proctored examinations
7. A student must submit the original SWAYAM-NPTEL Course Certificates to the Head of the Department concerned, with a written request for the transfer of the equivalent credits. On verification of the SWAYAM-NPTEL Course Certificates and approval by the head of the department, credits will be awarded.
8. The Institute shall not reimburse any fees/expenses a student may incur for the SWAYAM-NPTEL Courses.
9. If the SWAYAM/NPTEL course calendar does not align with the institute's calendar, the department shall facilitate and conduct examination of the relevant course of equivalent credits in physical/virtual mode and award the credits accordingly.

### Guidelines for Evaluation

Continuous Internal Evaluation: (Weightage for Attendance: 5, Activity Based Learning Evaluation: 15)

The department shall declare the set of all applicable activities such as Problem Based Learning, Quizzes, Small Project, field work, group discussion, but not limited to etc. The course coordinator, in consultation with course teachers, shall select any two activities suitable for the course from the list declared by the department and get the selected activities approved from HoD. The Course teacher shall get the activities carried out by students, evaluate the student performance based on the prescribed rubrics. Department shall prepare the rubrics for all the activities and display the same before the commencement of academics.

In-Semester Examination: Written examination shall be conducted for one hour duration on First Module for 20 marks.

End-Semester Examination: Written examination shall be conducted for two- and half-hour duration on Modules II, III, IV for 60 marks.
